

Scrum Master

Overview of the role:

In this role the applicant will become part of a large team working to meet the needs of both internal departments and external clients. The applicant must cultivate an agile mindset by driving a thought process that involves understanding, collaboration, learning and staying flexible.

Roles and responsibilities:

- Using agile methodology values, principles, and practices to plan, manage, and deliver solutions
- Training, mentoring, and supporting scrum teams to follow agile values, principles, and practices
- Help teams to determine and manage tasks, issues, risks, and action items
- Scheduling and facilitating scrum events, meetings, and decision-making processes
- Monitoring progress and performance, help teams to make improvements
- Ensuring the proper use of collaborative processes and removing impediments for the scrum team
- Facilitate internal communication and effective collaboration
- Work with product owners to handle backlogs and new requests
- Guide development teams to higher scrum maturity
- Help build a productive environment where team members 'own' the product and enjoy working on it

Educational / Experience requirements:

- Scrum master certification (mandatory)
- Basic understanding of software development
- Bachelor's degree (advantage)
- Excellent communication and servant leadership skills
- Problem solving and conflict resolution ability

- Efficient organizational skills

Additional information:

- Closing date:
- Type of role: Permanent
- Location: Hybrid Model (Centurion).
- Salary: to be discussed, in line with skills and experience.

This role represents a fantastic opportunity to join a respected team. If you are interested and meet the selection criteria, please send your CV to Keshnee Reddy-Chetty, Keshneer@icetech.io.
